## What is White Label SEO?

White label SEO refers to SEO services that are provided by one company and rebranded by another. Essentially, it allows marketing agencies to offer SEO services to their clients without having to handle the actual work themselves. Instead, the SEO tasks are outsourced to a provider like Mind Mingles, who completes the work behind the scenes. The client-facing agency then presents the results to their clients under their own brand. This approach allows agencies to expand their service offerings and increase revenue while maintaining their brand identity.
